## COMPUTER SCIENCE STUDENT

## ABOUT MYSELF

I am a Computer Science student driven by curiosity and a passion for building technology that makes an impact. My interests span software engineering, artificial intelligence, web development, and product design. I enjoy turning ideas into polished applications by combining technical skills with a strong focus on user experience.

## EXPERIENCE

### Woxsen Japan Centre

*Senior Executive*

- Coordinated logistics for university events involving multiple departments.
- Developed communication and project management skills.

### Single Point Solutions

*Intern*

- Worked on assigned technical/business tasks.
- Collaborated with professionals in a corporate environment.
- Gained exposure to real-world workflows and problem solving.

## EDUCATION

### Undergraduation

Bachelor of Technology (B.Tech.) in Computer Science  
2025 - 2029

### Higher Secondary Education (Class XII)

MBiPC (Mathematics, Biology, Physics, Chemistry) 2023-2025

## PROJECTS

### Labelum - AI Nutrition Scanner

- AI-powered web app for nutrition label analysis using OCR.

### Amphibious Drone Prototype

- Designed a multi-terrain amphibious drone prototype.
